

COVID-19 and Inequality – Factsheet for the Survey “Working from Home“

Survey 1 (Z0)

Survey mode: Online survey

Basic population: Employed persons in Germany who work from home, aged 18 and over, representative of the total working population in terms of age and gender.

Selection of respondents: Online Access Panel from Respondi. Membership and participation is voluntary and follows a double opt-in registration process. The panel is actively managed centrally by a professional panel team. In a scoring and control process, the panel is subject to permanent quality control. In the recruitment process via opinion portals, intrinsic motivations are at the forefront. This counteracts a distortion of the sample with regard to the professionalisation of the participants. Respondi is a member of the DGOF (<https://www.dgof.de/>) and is committed to the ICC/ESOMAR Code (https://www.esomar.org/uploads/public/knowledge-and-standards/codes-and-guidelines/ICCESOMAR_Code_German_.pdf).

Selection probabilities (quotas) for age and gender were determined on the basis of data on the labour force from 2018 from the Federal Statistical Office.

Data collection: Sosci Survey GmbH (<https://www.soscisurvey.de/>)

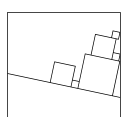

Number of respondents: 699 participants

Number of variables: 84 items

Duration of the survey: 9:02 min (mean value)

Field time: 30.03.2020 - 31.03.2020

Publication of the data: The data will be made available for scientific analysis by third parties after completion of the analyzes. Anyone who would like to have access to the data at an earlier stage - for example for replication purposes or for research cooperation - can contact the survey coordinator Florian Kunze (florian.kunze@uni-konstanz.de) by e-mail with an outline of the project.

Survey 2 (Z1-Z8)

Survey mode: Daily online survey over 8 working days

Selection of respondents: Respondi's Online Access Panel. Study participants* who have already taken part in Z0 were interviewed in the diary study over eight working days.

Data collection: Sosci Survey GmbH

Number of respondents: between 544 and 350 participants

Number of variables: 37 items

Duration of the survey: 2:00 - 2:70 minutes per day (average value)

Field time: 31.03.2020 - 09.04.2020

Publication of the data: The data will be made available for scientific analysis by third parties after completion of the evaluations. Anyone who would like to have access to the data at an earlier stage - for example for replication purposes or for research cooperation - can contact the survey coordinator Florian Kunze (florian.kunze@uni-konstanz.de) by e-mail with an outline of the project.

Survey 3 (Z9)

Survey mode: Online survey

Selection of respondents: Respondi's Online Access Panel. Study participants* who have already participated in Z0 were interviewed again.

Data collection: Sosci Survey GmbH

Number of respondents: 543 participants

Number of variables: 88 items

Duration of the survey: 8:48 minutes (mean value)

Field time: 15.05.2020 - 19.05.2020

Publication of the data: The data will be made available for scientific analysis by third parties after completion of the analyzes. Anyone who would like to have access to the data at an earlier stage - for example for replication purposes or for research cooperation - can contact the survey coordinator Florian Kunze (florian.kunze@uni-konstanz.de) by e-mail with an outline of the project.
